MONTANOV™ L is well-suited to formulate different textures (from sprayable to butter cream) no matter the nature or the quantity of fatty phase used. It stabilizes emulsions, and has a strong moisturizing power since it promotes liquid crystals which prevent the skin from dehydration (efficacy proven in vivo).

**AQUAXYL™** (Xylitylglucoside & Anhydroxytilol & Xylitol) AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted and water loss is reduced (in vitro and in vivo tests prove this efficacy).

**CODIAVELANE™ BG PF** (Aqua/Water and Butylene Glycol and Codium Tomentosum Extract) Water soluble active extracted from "velvety alga" to facilitate high hydration by its richness in marine sugars.

**HYDRALIXIR™ LD** (Aqua/Water - Laminaria Digitata Extract) Cellular water from Laminaria digitata (algae: organic farming / ethical & sustainable harvest): an eco-designed by-product, resulting from an energy efficient process (gentle drying). A natural alternative to replace a part of the freshwater used in cosmetic formulations.
