

SKIN CARE

EU07737 | MY DAILY RESTORATIVE SERUM

A dose of freshness for a revitalized skin

NOC= **98.5%**
NATURALITY PROFILE according to ISO 16128 norm

Anti-ageing
Restorative effect
Soft and velvety

* Data provide from OECD tests, QSAR calculations, products SDS and literature.

A	Water	Up to 100%
B	SEPLIFE™ G305	1.20%
	EMOGREEN™ L19	2.00%
	Argania spinosa kernel oil	4.00%
C	AQUAXYL™	1.00%
	JUVENESSENCE™	1.00%
	SEPIFINE™ BB	1.00%
	Tocopherol	0.05%
	Benzyl alcohol & dehydroacetic acid	1.00%

White cream gel / Packaging: Pump

Challenge test: in process

pH: 4.9

VISCOSITIES: D7 at RT: 8000 mPa.s Brookfield M3V6

STABILITY: D7 at RT, 45°C

FORMULATION ADVICES: Laboratory scale - Rayneri with defloculator

Mix the Sepilife with the oils of phase B, add under deflocculating agitation in the water. When the cream gel is homogeneous, add the other ingredients of phase C. Adjust pH 5 if necessary.

COLD PROCESS

An effective anti-aging formula that restores softness and youth to your face

With this serum your face will be moisturized and rejuvenated!

AQUAXYL™ moisturizes and restructures the skin (xylitylglycoside & anhydroxytilol & xylitollorem) by harmonizing the hydric flow of the skin. **Water reserves** are instantly **boosted**, **water circulation is improved** in all skin layers and **water loss is reduced** (in vitro and in vivo tests prove this efficacy). Its mechanism of action has been validated by cosmetogenomics. Cosmos and Natrue approved.

A fresh and gliding touch with a soft afterfeel thanks to **EMOGREEN™L19** (C15-C19 Alkane), a **non polar and biodegradable**, bio-sourced **emollient**. It's **THE alternative to silicone oils**. This high purity vegetable alkane is conformed to Cosmos and Natrue. Inert and stable, it can be used in all types of applications, even in extreme conditions (pH, oxidizing/reducing media...)

An anti-ageing effect with **JUVENESSENCE™** (Caprylic/Capric Triglyceride/Algae Extract), an **oily active** from a brown alga to enhance skin youth. It acts to downregulate progerin production in aging cells and to **preserve the skin tissues from accelerated aging** (in vivo study)

SEPIFINE™ BB brings a soft skin finish. (Amylopectin)

It is a natural texturizing powder, ethically sourced, coming from babassu nut exclusively sourced in Brazil. This biodegradable powder provides a **soft and velvety skin finish** while creating a pleasant playtime and matt effect.

SEPLIFE™ G305 stabilizes and texturizes the cream gel without emulsifier (Acrylamide/Sodium Acryloyldimethyltaurate Copolymer and C15-19 Alkane and Polyglycerin-10 Laurate and Polyglycerin-10).

It is an **upgraded ionic Sepigel 305** with 62.5% of natural origin content according to ISO 16128. It is inherently biodegradable: 44% in 28 days*. Pre-neutralized **liquid polymeric thickener** on a wide range of pH (3-12), it presents similar high performance and sensoriel to that of Sepigel 305.

ADDITIONAL INGREDIENTS: argania spinosa kernel oil OLVEA - tocopherol BASF - benzyl alcohol & dehydroacetic acid LONZA
