Aspect : Solid with color

pH: N/A / **VISCOSITIES: 1M at RT**: N/A

Recovery at RT (after 1M at 45°C): N/A

STABILITY: 3M at 45C & RT; 3 F/T cycles (-5C/+40C)

FORMULATION ADVICES: Laboratory scale - 300g batch

Combine phase A and heat to melt polyhydroxystearic acid. Add phase B to phase A and homogenize for 7 minutes at 9,000-10,000 rpm to disperse pigment. Stop homogenizing and add phase C to phase AB and heat to 75-80C under magnetic stirring bar. Slowly air cool the batch down to 70C and add phase D. Mix well and pour at 55C.

All information contained in this specific technical documentation is believed to be accurate and has been set up by Seppic according to its own described methods and processes. Seppic however does not assume any liability or risks involved in the use of its products for the preparation and the assessment of the hereinabove formulation since the condition of use are beyond its control. Seppic customer must insure that the duplication of the hereinabove formulation is not infringing any intellectual property rights and that it complies with any regulatory status. Formula only for demonstration purposes. Seppic has not tested efficacy, toxicology and safety of this formulation if not mention.

HIGHLIGHT:

EMOGREEN™ L19, DUB SHOREA T & DUB ESTOLINE® provide a fresh & light glide on the skin with a soft and powdery finish, enhancing the creamy texture of this formula.

SEPILIFT™ DPHP & ANTILEUKINE™ 6 form a powerful duo, working together to deliver unparalleled anti-aging benefits and remarkable skin-firming properties.

Apply directly to areas of concern and blend gently with fingertips or a makeup sponge for best results.
