With WESOURCE

Opaque white cream / Packaging: Jar

pH: 5.3 / **VISCOITIES: 1M** at RT: 675,000 cps Brookfield LV96 @0.6rpm/

Recovery at RT (after 1M at 45°C): 336,000 cps Brookfield LV96 @0.6rpm.

STABILITY: Passed 3 month at RT, 45°C, 3 F/T cycles -5°C/+40°C, & 3 F/T cycles -18°C/RT

FORMULATION ADVICES: Laboratory scale - 300g - Defloculator

Combine phase A and mix well with defloculator. Combine phase B and heat to 75C and then disperse phase C into it. While stirring phase A, add phase BC and mix for 2 minutes (slightly creating vortex). Add phase D and mix until nice emulsion is formed. Then add phase E and mix well. Check pH to make sure it is 5.0-6.5.

This ultra-rich and thick cream leaves the skin supple and hydrated without greasiness.

Plump, smooth, and firm your skin!

SEPI NOV™ EMT 10 stabilizes 30% oily phase by itself! (Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer)

A **pre-neutralized powder polymeric thickener**, working on a wide pH range (3-12). It also provides excellent **oil stabilizing property** even in presence of a high percentage of oily phase. It imparts satiny and fresh skin feel.

DUB OE HP MB* and **DUB CO*** esters improve the **spreadability, reduce the greasy skin feel and leave a soft finish.**

DUB OE HP MB*: a natural ester ideal for D5 replacement (Ethyl Oleate)
DUB CO*, a sensory alternative to isopropyl myristate (Ethylhexyl Cocoate)

DUB CIRE H1* and **DUB SHOREA T*** bring viscosity and melting effect to this rich cream

DUB CIRE H1: A combination of natural saturated vegetable oils providing unique **texturizing and high melting properties** with a long-lasting residual film. (C10-18 Triglycerides)

DUB SHOREA T*, a **butter with matte finish** (Shorea robusta seed butter)

BIOPHYTOSEBUM** restores the **lipidic skin barrier** (Olive Oil Decyl esters (and) Squalene)

A natural active emollient from olive, **preventing water loss and increasing firmness and elasticity** (in vivo tested). With its easy spread, high penetration rate and non greasy feel, it can be used as silicon alternative.

A soft and velvety skin feel with SEPIFINE™ BB powder (Amylopectin)

A natural texturizing powder, ethically sourced, leaving a **matt effect**.

An intense regenerating treatment with SEPIlift™ DPHP & VOLUFORM™:

SEPIlift™ DPHP Boosts and protect the skin collagen (Dipalmitoyl Hydroxyproline): It moisturizes the skin and **reduces the appearance of visible signs of aging.**

VOLUFORM™ restores the face volume and firms the skin (Palmitoyl Isoleucine): **Plumping and firming effect on the thin and sagging skin.**

ADDITIONAL INGREDIENTS: Phenoxyethanol (and) Ethylhexylglycerin: EUXYL® PE9010 (SCHULKE) / Fragrance "Lotus Blossom" (GIVAUDAN)
